

NANCY BEST FOUNTAIN OPENING SOON!

Dear Neighbors,

Beginning **Monday, September 12**, the construction fence will begin coming down, and it will be temporarily replaced with a low-profile barricade through Wednesday afternoon!

On **Wednesday, September 14** at 3 PM, we will host a preview for the media. *Neighbors are welcome during this time and anytime thereafter.*

By day, the Fountain will serve as an interactive play area for families and a relaxing respite in the heart of downtown, and it will be on from 8 AM to 10 PM. Like all fountains in the Park, the Nancy Best Fountain is powered by recirculated water, which goes through a continuous filtration and sanitizing process.

Each evening at sunset, it will perform a 30-40 minute show, which will change monthly. During the first month or two, we expect excitement and crowds; however, experience tells us that will normalize fairly quickly. Also, great care has been taken to ensure the water, sound, and light stay in the immediate area; however, we always welcome constructive feedback at info@klydewarrenpark.org.

Finally, we are working with the architects to beautify the back of the restroom building and, using the helpful feedback we've already received, we're confident that a good plan is being developed.

In October, we hope to open the new Sheila and Jody Grant Children's Park, which was made possible by the Perot family, just in time to celebrate the Park's 10th anniversary!

We can't thank you enough for your patience and support during construction, and we hope you will enjoy these new amenities, which are free to the public, thanks to our donors!
